Michelle A. Green : 3,2,1 Code It! (with Premium Web Site 1-Year Printed Access Card and Cengage EncoderPro.com Demo Printed Access Card) before purchasing it in order to gage whether or not it would be worth my time, and all praised 3,2,1 Code It! (with Premium Web Site 1-Year Printed Access Card and Cengage EncoderPro.com Demo Printed Access Card):

1 of 2 people found the following review helpful. Needs ImprovementBy JayBetween work, going back to school, and helping raise three kids time is the most precious resource that I have. This book seeks to waste as much of it as possible. For a textbook that is used in college level courses I find it to be poorly organized and at times unprofessional. Granted there is turmoil in the coding field caused by the delay of the implementation of ICD-10-

CM/PCS. However, how the author covers this discussion between ICD-9 and ICD-10 it is unclear at times which classification is being discussed. Additionally, the answers to various quiz questions are not in the back of the book, like most of the other texts. They are only given in the instructor's manual. In today's 24/7 environment how is this functional? I am taking this course online, and given my work/life schedule I am not very keen about wasting time and emailing my instructor to see if I am answering the questions correctly. Finally, the author's disdain for ICD-9 and the failure of ICD-10 from being implemented is readily apparent and eventually wears thin. It is time to move on.

Happy with book thanks

3-2-1 CODE IT! 4E is the premier, easy-to-use medical coding guide for both beginners and experienced professionals. This best-selling textbook begins with diagnosis coding, then builds on this foundation through in-depth instruction on ICD-9-CM, CPT, and HCPCS Level II coding. 3-2-1 CODE IT! 4E prepares readers better than ever for earning a coding credential by using the latest code sets, conventions, and guidelines. This edition also features strategic tips on career advancement that readers will find helpful for years to come.

"The "coding tips" are very explanatory. I love the way the book is structured, table of contents. It goes hand in hand in how I teach my students." "I have recommended this textbook to other colleagues to teach coding. Because of the step by step approach this textbook is fantastic for the beginner coder that is seeking a position in a physicians' office, outpatient clinic, lab, urgent care center and emergency department billing."

About the Author
Michelle A. Green, MPS, RHIA, FAHIMA, CPC, is an Adjunct Professor in the Health Information Technology Department at Mohawk Valley Community College, Utica, New York. She also teaches in the Health Information Management Department at Mount Wachusett Community College, Gardner, Massachusetts. Ms. Green held the position of SUNY Distinguished Teaching Professor in the Physical and Life Sciences Department at the State University of New York, College of Technology, Alfred, from 1984 through 2016. An active member of the American Academy of Professional Coders (AAPC) and American Health Information Management Association (AHIMA), Ms. Green has been recognized both for her excellence in teaching and for her significant contributions to the Health Information Management profession. She has earned numerous awards, including the State University of New York Chancellor's Award for Excellence in Teaching, Alfred State College's Alumni Association Teacher of the Year, Who's Who Among America's Teachers, and the FORE Triumph Educator Award from the AHIMA. Ms. Green is a Registered Health Information Administrator (RHIA), a Fellow of the American Health Information Management Association (FAHIMA), and a Certified Procedural Coder (CPC). She earned a BS from Daemen College and an MPS degree from Alfred University. Ms. Green has authored three successful books related to coding and health information management.
