Tom Taylor : All-New Wolverine Vol. 1: The Four Sisters before purchasing it in order to gauge whether or not it would be worth my time, and all praised All-New Wolverine Vol. 1: The Four Sisters:

6 of 7 people found the following review helpful. Not the Best at What She Does, but Nowhere Close to the Worst By TheAceOfSkullsAs she herself admits in the book, she's Laura, X-23, and Wolverine, and she's not trying to replace her father as much as keep his legacy alive, which is a good summary of this book to be honest. A very Wolverine-ish story about shadowy organizations (Alchemax, as they are slowly becoming the evil scientists of the world) playing

with Wolverine's genes to create super soldiers. Laura, however, is not trying to fill Logan's shoes so much as follow what he taught her back when they were together, and she manages to tackle things in a less violent (as pointed out by a lot of people she comes across) and yet still very familiar way. Her first adventure manages to work in superscience (Pym style), magic (Strange style), and good old fashion claws vs private military action, as she tries to find a balance between what she was made to do and what she wants to be, and if you can't tell there's a lot of metaphors hidden in all the subtext of this book that make it a joy to pick through. If I do have to leverage complaints: this is going to seem like a fairly tame beginning for her story, as there's no costumed villains running around (save an appearance so short it's more of a cameo despite having a nice fight to go with it) and most of the X-23 clones aren't too interesting outside of a couple of good scenes. However the sincere moments where we see inside the mind of our new yellow-and-blue sniktub are good enough to elevate it above "average" and it does set up for an interesting aftermath following the events of this book (at least with the new characters and how they're going to fit into Laura's life). The series does call back to some of X-23's history but besides for knowing what the stinger means (someone familiar shows up) and what the various pictures that are a little more vague that happen in a splash page flashback are, you don't really need to be too familiar with Laura to read this one and enjoy it. So in the end it's not a must-have book, but it's not a terrible one either, and there's just enough in here to really dig into.

0 of 0 people found the following review helpful. It's ok. Not awful but not great

By Anthony Polinick This book is a fun and easy read. Nothing really spectacular about it. If you're looking for simple superhero fun, then it's a good choice. I don't think it will top any best of lists though. I wish I could give it a 2 1/2 to be honest

By srchlightsoul X-23 is an awesome character, and this is a great start for the passing of the cowl from Logan to Laura. I recommend it.

Now SHE'S the best there is! X-23 was created to be a weapon and, for a time, that's all she was. But with the help of her mentor, Logan - the original Wolverine - she escaped that dark past. Now the man she knew has fallen, but Laura will honor his memory as the All-New Wolverine. But with the famous cowl comes a world of misery and mystery...like the devastating secret of the Four Sisters. Uncovering it will involve new friends Dr. Strange and the Wasp, and lethal new enemies like the Taskmaster! But after recent events, Laura is growing used to doing everything in her power to save those around her from forces hell-bent on destruction. If anyone can stop them, it's Laura. After all, it's what Wolverine does.

COLLECTING: ALL-NEW WOLVERINE 1-6
