Shirow Masamune : Appleseed, Book 3: The Scales of Prometheus before purchasing it in order to gage whether or not it would be worth my time, and all praised Appleseed, Book 3: The Scales of Prometheus:

2 of 2 people found the following review helpful. Why not if you haven't already?By John KeslUmmmmmm, it's the third volume of the Appleseed saga. Very good story, right in the middle of Shirow-san's Appleseed powers, in my opinion. Lush art and an enticing and enthralling (for it's subject matter) story line. The format is well done, though I wish slightly larger as I think the art could use the room. I have the the other volumes from the Eclipse 1st Ed and the difference in size is quite noticeable. But, the price was right so....0 of 0 people found the following review helpful. I have always loved Masamune's booksBy Julia rossI have always loved Masamune's books, world, and characters.

While the story is basically strait forward the artwork is beautiful and the concept fascinating. For those who haven't read any of these this series is about a post appocalyps (world war/faction wars) utopia, and two characters trying to fit in after having lived in war torn lands for a long time.2 of 2 people found the following review helpful. Great story...By CheetahThis is a great story from the first two. Together they fight agaist a feline enemy. With a few twists and turns it makes it a great read. Pick it up and see for yourself. I can only say so much about it. I am a fan. :^}

A malfunctioning bioroid (enhanced artificial human) has been on a bloody rampage through the ruined streets of Manhattan. Now it's up to Deunan and Briareos to stop the man-eating machine before it reaches Olympus. However, within the utopian walls of Olympus plots begin to unfurl and more challenges attack our heroes. From malfunctioning monsters to tenacious terrorists, Shirow Masamune brings you the world of Appleseed. See the book that has inspired generations and defined the cyberpunk genre.
