From Fantagraphics Books : Hate Annual #8 before purchasing it in order to gage whether or not it would be worth my time, and all praised Hate Annual #8:

Hate Annual #8 features a whopping new 20 page Buddy Bradley story where Lisa (everyone's favorite psycho!)

makes her first foray into show biz and gets way more than she bargained for! This issue of P. Bagge's annual Hate also features strips compiled from his Discover Magazine gig: 5 biographies of scientists you've never heard of! - other than maybe Walter Reed, who's well known only for that hell of a hospital named after him, and not for the handy yet forgotten fact that he discovered how malaria is spread... All that and many other odds and ends from hither and tither (see below for details). Why love when you can Hate!
