A must own item for fans of Anderson's ShowsBy PwyllThis book is a collection of cutaway views of just about every vehicle and many buildings from the Anderson's SuperMarionation shows.I didn't know what to expect as I've only seen about half the shows featured in the book, but all the shows are presented as occurring in the same world but as different agencies. Civilian and non-agency vehicles (such as the Zero-X) are shown in a separate section as what the public would see.Don't expect the detail like the Haynes Thunderbirds manual contains, but expect excellent cutaway's with call-outs to all the major systems. This book is by a fan of the shows that had an opportunity to work with the creators of the shows. So this is a legitimate depiction of the World of Gerry Anderson.0 of 0 people found the following review helpful. Great inside review of the Gerry Anderson world.
