**Fred Van Lente : Ivar, Timewalker Volume 1: Making History (Ivar Timewalker Tp)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Ivar, Timewalker Volume 1: Making History (Ivar Timewalker Tp):

Padda (one of the three Brothers, the other two being Gilad, the Eternal Warrior and Armstrong of Archer Armstrong). Ivar has to come to stop Neela's experiments for he feels her work may soon threaten the stability of the space/time continuum while also drawing the dire attention of future time-travellers who now want to kidnap Neela. What follows is an insane, extraordinary adventure through time and space. After concluding his stellar run on Archer Armstrong, Fred Van Lente doesn't let up here, taking timey-wimeyness to a whole new level. Weaving in actual concepts from the current understandings of physics, FVL explores the haphazard nature of time-travel, causality, is it worth trying to kill Hitler, and can you really change history at all? Sprinkle in some mad-cap danger, suspense, and wit, and you have one of the most entertaining comics on the racks today. Clayton Henry's art is a perfect match for this level of fun. His panel layouts are inventive, adding flair to the chase scenes through time as Ivar seeks to protect Neela from the dark forces of the future. A clean, crisp style, bolstered by the strong color tones of Brian Reber. The book reads smart and looks smart. This is one of the best titles that VEI offers currently, a fine addition to their stable of quality comic books. Do yourself a favor, take a walk through time (and on the wild side) with Ivar, you won't be disappointed. 0 of 0 people found the following review helpful. An Interesting Start...By Dave Bell Jr. (Some minor spoilers are contained within) As the title suggests, this first volume of the Valiant series Ivar, Timewalker promises some interesting twists on old time travel concepts, and for the most part that is true. This story takes the base premise of the Stable Timeline theory, where every event is meant to happen as it is supposed to and nothing can change it, and explores it in more detail by initially talking about what nearly anyone with time travel powers would consider: killing Hitler before his rise to power. For the sake of saving some twists in the book, I won't divulge any more than that. What I will say is that there are some clever uses of time travel here, and even some intriguing ideas brought up, but this story is ultimately just another time travel story that is more interested in spectacle than exploring worthwhile theories. The titular character, Ivar, is by far the least interesting character in the book, with the only interesting bit being his connection to Armstrong (from Archer and Armstrong) and Gilad Anni-Padda (from the Eternal Warrior). The protagonist, Neela Sethi, seems to be nothing more than comic relief, filling the 'deer in the headlights' whose face is stuck in a perpetual state of fear and disorientation...at least in the first three chapters. The final chapter provides some very interesting character development and lays the foundation for what I can only assume is the over-arching plot. I found myself wanting more of this character's adventures, so in that regard the book succeeded. The art is solid all the way through, portraying the characters and environments in a realistic sense with a cartoonish twist to them (I defer back to Sethi's perpetual fear face). Clayton Henry is a very consistent artist with solid line work and designs, making the art the highest point of the book. Unfortunately, it isn't enough to bring it up beyond three stars for me. If I happen to garner more interest through reading some of the (frankly better) books in Valiant's lineup, I may pick up the other volumes in this series, but it is pretty low on my pull list at this time. If it happens to be available at your public library, definitely check it out. Otherwise, wait until it goes on sale. 0 of 0 people found the following review helpful. wild! By someone Fantastic story, great art!!! Worth it! I feel like everyone is doing the time travel / interdimensional thing, but so what!? It is amazing. Two thumbs up.

From the dawn of the dinosaurs...to the Battle of Trafalgar...to the end of time itself...the first century-spanning adventure of Ivar, Timewalker starts here! At this very moment in Geneva, Switzerland, history is being made. A thousand meters underground inside the Large Hadron Collider, researcher Neela Sethi is about to discover time travel and jeopardize her life in the process. But she doesn't know that yet. Ten minutes from now, every deadbeat chrononaut, wannabe conqueror, and misguided protector of the timestream will be banging down her door. Good thing that the legendary Ivar, Timewalker, got there first... right? Now it's down to history's most jaded, most tempestuous time traveler to stop the worst of everything that is, was, and will be... before time runs out! New York Times best-selling creators Fred Van Lente (Archer Armstrong, Amazing Spider-Man) and Clayton Henry (Harbinger, Incredible Hercules) begin a clock-stopping odyssey into the distant past, far future, and every moment in between right here with the first volume of Valiant's latest epic intro-priced at just \$9.99 for new readers!
