Greenagel IIMTMTE is the definitive Transformers story, in any genre. This volume concludes the first major arc of the voyage of the Lost Light. It wraps up several storylines. Mr. Roberts has been bloody, as he killed off a number of starring characters that were well developed and that readers enjoyed. He has done exceptional

work in the handling of death and how those around death react to it. His writing in this area in volumes 4 and 5 has been particularly impressive. Of all the many characters that Roberts has fleshed out (pun intended), Cyclonus is the most extraordinary. He is a former Decepticon that is on a ship of Autobots sailing through space working on a quest while getting constantly distracted. He is a bot apart. His isolation is fascinating. 1 of 1 people found the following review helpful. MTMTE is one of the best comics going. Highly recommended. 0 of 0 people found the following review helpful. great story, leaves you at the edge of your ... By samantha This comic- well drawn, great story, leaves you at the edge of your seat and you can't stop turning the pages. Expect lots of mind blowage, laughs, and jaw drops. 10/10 would recommend!

But larger forces are closing in and an ancient plan is reaching fruition and as an old friend calls time on the Autobots' quest, one thing becomes clear: the LEGISLATORS are on the march!
