**James Roberts : Transformers: More Than Meets The Eye Volume 7** before purchasing it in order to gage whether or not it would be worth my time, and all praised Transformers: More Than Meets The Eye Volume 7:

10 of 11 people found the following review helpful. Wow....Roberts does it again!!By MONTE M.I'm running out of superlatives for this book. Just amazing amazing work. Roberts has created a world so rich dense in detail its downright scary. The narrative flow is crazy good the art is strong as always. This story ties in directly with Vol. 3, specifically the "Shadowplay" chapters. I highly recommend going back reading the Shadowplay stories before even cracking Vol.

7 open. Especially if its been a while since you've read the Shadowplay arc. As I stated, this is a very dense detailed storyline, but It's def worth the extra investment of time will greatly enhance your enjoyment of Vol 7. It's an amazing time to be aTransformers comics fan MTMTE is the creme of the crop. As i've stated before, the MTMTE series is the best Transformers comic thats ever been produced in my opinion. Each new chapter just reinforces that belief for me. This is an amazing book with outstanding storytelling, art, humor heart. This is so much better than 99% of what DC Marvel are putting out currently. I hope more people continue to be turned onto it so they can dioscover how great it is for themselves.0 of 0 people found the following review helpful. an all time classic comic - this volume is one of the special greatsBy Frank L. Greenagel IIThis is a 6-star book. This is the finest Transformers volume yet. Roberts superlative work creating characters and developing storylines all blends together to form this truly perfect book. The art is excellent. The story moves along quite well. The writing is dense - not in a boring or overdrawn sense, but rather that Roberts writes so many more words per page than any other comic writer than I can think of. This comprises 5 issues (34 - 38), but it is a very long read. And so worth it.It is one of the great time travel stories I have ever read. A renegade Autobot goes back in time, and Rodimus and the others (including Whirl and Cyclonus, of course) travel back with him. During the story, we get to read a mesmerizing conversation between present Megatron and 4 million years ago Optimus Prime (then Orion Pax). There are all kinds of echoes from previous volumes (including vol. 3 of this series). There are a number of funny moments, and even a Back to the Future II series of references at the end of the book.Roberts has created such strong characters that they may actually write themselves at this point. Again, a truly great moment in comic making.0 of 0 people found the following review helpful. Five StarsBy Carissa C.Came as expected and in wonderful condition! Was a great read!

"Days of Deception" begins with peace and happiness. No conflict, no sadness, no angst.Collects issues #34-38.
