Shane McCarthy, Andy Schmidt : Transformers: The IDW Collection Volume 4 before purchasing it in order to gage whether or not it would be worth my time, and all praised Transformers: The IDW Collection Volume 4:

The beginning of the story had me confused, angry and disappointed. Did I miss something? Did I skip a page somewhere? Turns out the answer to both of these questions was no. I kept reading anyway. Then I turned one page and the tables turned! In fact, they turned in such a way that I

completely forgot how dismal and gloomy the story was before. This is most excellent story writing and it would be fantastic if the movies were based on these books instead of the toys. 0 of 0 people found the following review helpful. Five Stars By Abeanawesome2 of 2 people found the following review helpful. Dinobots By Rebecca As the cover suggests, the Dinobots are in this one and oh boy! are they great. I already greatly advise fans to own this collection, but this volume is specially made for Dinobots' lovers!

The re-presentation of IDW's Transformers Universe continues in volume 4! This volume includes the Transformer series Maximun Dinobots and the four-part Drift story, as well as Spotlights: Cyclonus, Hardhead, Doubledealer, Sideswipe, Drift, Metroplex, and Jazz.
